

Van Halen's Guitar Heads For Smithsonian

RadicalRed, 2018

EDDIE VAN HALEN's most famous guitar has been handed to America's Smithsonian museum - but it won't be on display to the public.

The rocker's iconic red, white and black instrument - nicknamed Frank 2 - has found a new home at the National Museum of American History in Washington, D.C.

But Van Halen fans will not be able to view the homemade, Fender-style guitar - a spokesman for the Smithsonian tells Spinner.com the instrument will not go on show.
